

**AMENDMENTS TO THE CLAIMS**

The following listing of claims will replace all prior versions and listings of claims in the application.

**LISTING OF CLAIMS**

1. (Previously Presented) A high-density recording medium, comprising:
  - a lead-in zone in which recording medium information is recorded ; and
  - a specific area, prior to said lead-in zone, in which disc information regarding a recording capacity of said high-density recording medium is recorded, wherein the disc information is one of the recording medium information recorded in the lead-in zone, the specific area is a burst cutting area and the burst cutting area includes a plurality of data units, each data unit is composed of 16 information data and 16 parity data and the disc information is included in 16 information data of at least one data unit.
2. – 4. (Cancelled)
5. (Previously Presented) The high-density recording medium as set forth in claim 1, wherein said disc information is repeatedly included in each data unit.
6. (Previously Presented) The high-density recording medium as set forth in claim 5, wherein said disc information is channel bit length information variably set to a different value depending on the recording capacity of said high-density recording medium.
7. – 40. (Cancelled)
41. (Previously Presented) The high-density recording medium as set forth in claim 5, wherein each disc information is recorded in predetermined byte position in each data unit.

42. (Previously Presented) The high-density recording medium as set forth in claim 5, wherein the high-density recording medium can record 25GB when the channel bit length is 74.5nm and 27GB when the channel bit length is 69nm.
